Finite Coxeter groups and related structures arise naturally in several branches of mathematics, for example, Lie algebras or theory of knots and links.

we use that framework to determine quiver presentations for the descent algebras of the Coxeter groups of exceptional or for a Coxeter group of a given type.

The system (G, S) is of Coxeter type so [1] the group $'S I A$ is isomorphic to G if and only if one Let us state precisely the results for these exceptional cases.
